### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1-7 are presented for examination.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Chauvin et al.

With respect to claim 1, Chauvin et al. teach the claimed binning frame geometries into screen tiles, at the abstract; determining the visible fragments of said geometries for each of said screen tiles by traversing said geometries multiple times, at columns 34-56 which teach several embodiments of the fragment operations, examples of multiple traversals can be found at least at figure 16, and at column 50 lines 14-19; rasterizing parameter values for said visible fragments, at column 50 lines 10-20; shading said visible fragments, at column 50 lines 10-20; and resolving colors for each pixel, at column 34 lines 53-55 and at column 35 lines 6-9.

Claim 2 further requires said binning step includes screen space tiling. Chauvin et al. teach this at the abstract.

Claim 3 further requires said binning step uses single+.buffering for page memory management. Chauvin et al. teach this at column 36 line 61 to column 37 line 35.

Claim 4 further requires wherein said determining step generates depth information. Chauvin et al. teach this at figure 16.

Claim 5 further requires wherein said determining step scan converts primitives. Chauvin et al. teach this at the abstract.

Claim 6 further requires said determining step outputs visible fragments and visible geometries. Chauvin et al. teach this at figure 19.

Claim 7 further requires said determining step stores visibility information on a first pass and outputs visibility information on a last pass. Chauvin et al. teach this at figure 16.
